adapterCache

```
// SetAdapter changes the adapter for this cache.  
// Be very note that, this setting function is not concurrent-safe, which  
means you should not call  
// this setting function concurrently in multiple goroutines.  
func (c *Cache) SetAdapter(adapter Adapter)
```

-Redis

adapter

```
// GetAdapter returns the adapter that is set in current Cache.  
func (c *Cache) GetAdapter() Adapter
```

-Redis
