

ORM-All/One/Array/Value/Count

5

```
func (m *Model) All(where ...interface{}) (Result, error)
func (m *Model) One(where ...interface{}) (Record, error)
func (m *Model) Array(fieldsAndWhere ...interface{}) ([]Value, error)
func (m *Model) Value(fieldsAndWhere ...interface{}) (Value, error)
func (m *Model) Count(where ...interface{}) (int, error)
func (m *Model) CountColumn(column string) (int, error)
```

1. All /
2. One
3. Array
4. Value Fields
5. Count

WhereArrayValue

```
// SELECT * FROM `user` WHERE `score`>60
Model("user").Where("score>", 60).All()

// SELECT * FROM `user` WHERE `score`>60 LIMIT 1
Model("user").Where("score>", 60).One()

// SELECT `name` FROM `user` WHERE `score`>60
Model("user").Fields("name").Where("score>", 60).Array()

// SELECT `name` FROM `user` WHERE `uid`=1 LIMIT 1
Model("user").Fields("name").Where("uid", 1).Value()

// SELECT COUNT(1) FROM `user` WHERE `status` IN(1,2,3)
Model("user").Where("status", g.Slice{1,2,3}).Count()
```
