```
$ gf gen -h
USAGE
  gf gen COMMAND [OPTION]

COMMAND
  ctrl      parse api definitions to generate controller/sdk go files
  dao       automatically generate go files for dao/do/entity
  enums     parse go files in current project and generate enums go
file
  pb        parse proto files and generate protobuf go files
  pbentity  generate entity message files in protobuf3 format
  service   parse struct and associated functions from packages to
generate service go file

DESCRIPTION
  The "gen" command is designed for multiple generating purposes.
  It's currently supporting generating go files for ORM models, protobuf
and protobuf entity files.
  Please use "gf gen dao -h" for specified type help.
